

EOD004 LARGE DIAMETER TELESCOPIC VEHICLE MIRROR

5 YEAR GUARANTEE ON MIRROR FRAME AND HANDLE

Never has the need for vigilance been greater, be it on the look out for people, explosives or contraband. As such DSE International's range of search mirrors is designed to be comfortable, robust and offer a high level of illumination to help pinpoint any suspicious objects.

The **Large Diameter Telescopic Vehicle Mirror** is manufactured using PMMA plastic which is high impact and weather resistant. The mirror and mirror housing are contained within a high impact rubber housing. The telescopic arm is made of anodised aluminum with a solid soft handle for excellent grip. The telescopic handle can extent from 40 - 110 cm. The handle can be folded under the mirror for minimum storage. Illumination is provided by a multiple LED system housed within the mirror.

The system is available with a **25** or **35** cm diameter mirror and can be supplied with wheels if required. Please specify when ordering.
