SUV014 WIRELESS STETHOSCOPE TRANSMITTER AND RECEIVER KIT

The Wireless Stethoscope Transmitter and Receiver Kit is designed to allow one to listen remotely through doors, windows and plaster by utilising up to 4 different stethoscope transmitters (2 supplied as standard) and transmit the audio to a receiver up to 300 metres away.

The system offers CD quality audio and can be supplied with a needle transmitter, network transmitter, vox transmitter and a remote control.

Specifications:

Transmitter
- Quantity: 2 transmitters supplied as standard
- Frequency: 1 channel (2 switchable) PLL stable
- Area: 800-2600MHz
- Potential: Battery 3.6V ER14250 ½ AA
- Current Consumption: 40mA
- Operating time: 20hrs
- RF-Power Output: 40mW
- Dimensions: 40 x 40 x 38mm
- Antenna length: 50mm
- Weight: 46g
- Microphone: Special mic for mechanical vibrations
- Amplifier: Compressor

Receiver:
- Frequency: 9 channels, switchable LED display
- Power supply: Li-Poly 7,8VDC 1800mA
- Current Consumption: 300mA
- Audio performance: 1w
- Antenna: SMA 3DB pivotable
- Dimensions: 108 x 62 x 26mm
- Weight: 180g

The system is supplied in a high quality metal case.
