

EOD050 35, 84 and 100 PIECE NON-MAGNETIC TOOL KITS

The Non-Magnetic Tool Kits are designed for EOD operations where direct contact with UXO is required and the use of magnetic tools may increase risk.

All tools are manufactured in beryllium copper alloy and hardened for durability. Each tool conforms to Stanag 2897 Annex C when supplied and is individually tested, numbered and certified. The tool kits are supplied in foam lined protective carrying bags, also fully certified as non-magnetic.

Available in 35, 84 and 100 piece kits.

Contents:
