MINE SHIELD

The MINE SHIELD is a special shield designed specifically for mine clearance work and the operatives that require protection from small anti-personnel mines during clearance operations.

The shield has two telescopic legs that can be placed into the ground to support it in the upright position. A view port is located centrally, below which there is a sliding hatch for the use of a manipulator.

Colours: Standard colours are Black or Olive drab. Other colours are available to special order.

Ballistic Performance: Fragmentation resistance - 17 grain V50 in accordance with STANAG 2920 - 650m/sec

Dimensions:

Overall	1000 x 700mm
Window	165 x 255mm
Port	100 x 145mm
Weight:	12.4kg
